

Calcium Molasses

Our Calcium Molasses is a Molasses based Block that is high in Calcium with trace elements and minerals for all year round feeding.

Available in 20kg & 100kg Blocks

Typical Analysis

Protein Meal	7.50%
Total Protein	3.5%
Molasses	32.80%
Calcium	14.60%
Phosphorus	1.10%
Salt	5%
Magnesium	4.05%
Copper	135mg/kg
Cobalt	20mg/kg
Iodine	102mg/kg
Manganese	1.2mg/kg
Potassium	60mg/kg
Selenium	7.2mg/kg
Zinc	81mg/kg

Recommended Intake			
Cattle	75-250g/h/d	Sheep & Goats	20-50g/h/d

From the dry tropical pastures through to cereal stubble crops, supplementing your livestock with our Calcium Molasses blocks will help your livestock stay in great condition.

The Dickson Ag Calcium Molasses Poured Blocks are designed for livestock that are calcium deficient or grazing on deficient pasture. Starting supplements early will limit the high consumption rate you may endure if you start to feed later into the dry season.

Our Calcium Molasses blocks are designed to ensure that your livestock are receiving the required levels of calcium. It is especially important for Pregnant or Lactating Livestock to be meeting their individual calcium requirements.

Calcium supplementation will ensure that your pregnant and lactating Livestock are producing strong offspring and adequate milk production. Our Calcium Molasses blocks will also result in improved bone growth along with higher conversion rates of cattle that are grazing deficient grass pastures in Australia.

Where the level of protein in pastures is very low, higher consumption will occur especially for lactating breeders.

Using this block as your supplementation will result in a reduction in the rate of weight loss and therefore helping your livestock maintain their condition in dry times.

DIRECTIONS FOR USE: Place out sufficient blocks so stock have ready access to blocks. Ensure adequate roughage is available.
