Recommended Intake			
Cattle	75-250g/h/d	Sheep & Goats	20-50g/h/d

Our 7% Phosphorus Molasses Block, is especially designed for northern Australia and it's wet weather conditions.

Being a block it is easy to feed out, therefore creating less wastage whilst being economic. With the majority of Northern Australia being majorly deficient in Phosphorus we all know the importance of getting the phosphorus into our breeders. We just need to do it!!!

**DIRECTIONS FOR USE:** Place out sufficient blocks so stock have ready access to blocks. Ensure adequate roughage is available.
