Supplements you can trust

CEREAL GRAZING SALT BLOCK

Our Cereal Grazing Salt Block has been designed to assist livestock that are grazing on lush green cereal crops or highly improved pastures.

These types of pastures are often low in calcium and magnesium, livestock will scour when first introduced and can actually lose weight. By Supplementing livestock you can prevent issues such as grass tetany, lower growth rates and scouring to maximise production.

TYPICAL ANALYSIS			
Bypass Protein Meal	27.00%	Magnesium	6.50%
Crude Protein	10.54%	Organic Zinc	550mg/kg
Total Protein	10.54%	Copper	675mg/kg
Grain	5.00%	Manganese	600mg/kg
Salt	24.20%	Iodine	510mg/kg
Molasses	5.00%	Potassium	300mg/kg
Calcium	6.00%	Zinc	405mg/kg
Phosphorus	1.80%	Cobalt	150mg/kg
Sulphur	2.50%	Selenium	36mg/kg
