# PRODUCTION SALT BLOCK

This block is ideal for all ruminants, especially lactating, joining and younger livestock that are chasing an extra boost. By using a combination of carbohydrates, bypass proteins and urea, ruminants can easily digest the poorest forms of roughage that would usually not be digestible by the animal at all, allowing livestock to continue going forward no matter the season.

| TYPICAL ANALYSIS    |        |            |          |
|---------------------|--------|------------|----------|
| Bypass Protein Meal | 35.00% | Phosphorus | 1.35%    |
| Crude Protein       | 16.76% | Sulphur    | 2.50%    |
| Equ Crude Protein   | 34.44% | Copper     | 450mg/kg |
| Total Protein       | 51.20% | Manganese  | 4mg/kg   |
| Grain               | 6.00%  | Iodine     | 340mg/kg |
| Urea                | 12.00% | Potassium  | 200mg/kg |
| Salt                | 23.00% | Zinc       | 270mg/kg |
| Molasses            | 5.00%  | Cobalt     | 100mg/kg |
| Calcium             | 5.23%  | Selenium   | 24mg/kg  |

**AVAILABLE WITH 6% AND 12% UREA INCLUSIONS TO SUIT YOUR OPERATION**
