Supplements you can trust

WEANER MOLASSES BLOCK

Our Weaner block is designed to aid in the growth and development of weaners. Through a combination of bypass protein, grain and urea this block provides 28% protein which is essential to optimize the health and productivity of younger livestock. Ensuring heifers meet target joining weights is critical in a Northern Australian beef enterprise, where one of the biggest profit drivers for a business is fertility. By supplementing weaner with the Dickson Ag weaner block, you are providing heifers with the necessary nutrients to reach target joining weights earlier.

TYPICAL ANALYSIS	
Protein Meal	10.00%
Total Protein	28.66%
Urea	8.00%
Grain	10.00%
Molasses	34.00%
Salt	4.00%
Calcium	4.90%
Phosphorus	2.70%
Sulphur	1.00%
Magnesium	3.24%
Copper	90mg/kg
Manganese	8mg/kg
Iodine	68mg/kg
Potassium	40mg/kg
Zinc	54mg/kg
Cobalt	20mg/kg
Selenium	4.8mg/kg
